Vetro 40

Vetro 40 is a sliding system suitable for glass doors without drillings and clamp height 40 mm. This system match both with monolithic and laminated glass, with thicknesses from 8-8,7 mm (5/16") / 10-10,7 mm (3/8") / 12-12,7 mm (1/2"). Vetro 40 integrates the new sliding trolleys, with Fluid technology: the movement turns out to be extremely soft, in opening and closing, for a costantly improved user experience.
